TRENCHLESS EQUIPMENT PIPE BURSTING

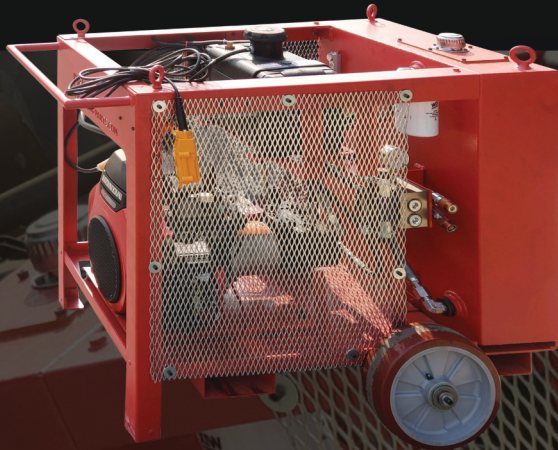

All of Trenchless Equipment's (TE) tools have been thoroughly tested by local contractors before marketing them. TE is the Exclusive Distributor for Pipe Bursting Parts (PBP) line of equipment. The PBP hydraulic unit pulls a wire rope connected to a bursting head in the pipe, bursting or splitting the pipe and moving the soil back so the replacement pipe can slide into place. The strength and size of the hydraulic puller you choose from TE will depend upon the type of jobs you engage in, whether you perform commercial, industrial, municipal or residential jobs.

THE PBP 24HP BIG RED INDUSTRIAL HYDRAULIC PUMP

The New Robust PBP BIG RED is the 5th in a series Hydraulic Power Supplies that Pipe Bursting Parts builds piece-by-piece in house. BIG RED is an industrial Model that has four pick points and fork-lift pads to lift the unit from the bottom. The 24HP Pump can power both your PBP 30 and PBP 50 pipe bursters. This model comes with a 5 gallon gas tank and a 20 gallon oil tank. PBP runs a thorough in-house testing process prior to delivering them to you. BIG RED is a Honda Certified 24 horse power engine that comes with a 3-year warranty.*

BIG RED, DELIVERS THE SPEED YOU NEED

After working closely with our contractors, we determined that a robust chassis and a dependable power supply are essential for our clientele. Ask us how this pump has been found to be the best on the market. We were determined to think of everything in order to save you time and money. We don't want a dead battery to prevent you from finishing your job. To ensure you understand how these improvements work we'll spend a day with your team. PBP engineers its equipment to save the contractor time and money over the long run. We understand that the Commercial and Municipal contractor have a limited work time to complete their project due to project limitations. To this end, TE will always work closely to provide technology to meet these limitations.

SPECIFICATIONS

- **Pump:** Variable Speed Piston Pump
- **Hydraulic flow rate:** 4 to 10 GPM
- **Fuel Type:** Gasoline – Octane 87
- **Fuel Reservoir:** 5 Gallons
- **Hydraulic Reservoir:** 20 Gallons
- **Engine:** Honda V-Twin 24HP
- **Dimensions:** 34.5" x 50" x 40.5"
- **Gross Weight:** 650 pounds (Wet)
- **Features:** Electric start, heavy-duty twist-lock remote control pendant, pressure gauge, hour-meter.

TRENCHLESS EQUIPMENT SOLUTION

PBP has been manufacturing pipe bursting equipment for over 22 years. In this time, they've worked closely with contractors and municipalities who've used other trenchless equipment technology and based upon contractor and municipality's input PBP has made improvements in technology. TE will never sell a tool that hasn't been thoroughly tested in the field prior to marketing it to the public.

TE prides itself on superior customer service and commit to working closely with its clients to ensure that Pipe Bursting Parts equipment generate confidence in the contractors' ability to provide superior service to their clientele.
